

Main bearings: T3 Segment - Spherical roller bearings

Project 'MSC'
Rack and pinion jacking system
in offshore platform

Main bearings: T3 Segment - Spherical roller bearings

Spherical roller bearings for rack and pinion system of NG and CJ series drilling rigs working in harsh environmental conditions

Up to 240 mm inner diameter

Design and execution to withstand heavy loads and variable speeds (0,3-1,2 m/min)

Safety factor (S_0) as per marine specifications

Design life (L_{10}) \approx 10 years service

Rack and pinion jacking system in offshore platform
