

Main bearings: T3 Segment - Split spherical roller bearings

Main bearings: T3 Segment - Split spherical roller bearings

Time saving bearing replacement
in hard-to-reach positions

Up to 560 mm inner diameter

Manufacturing technology and
expertise for top reliability

Engineered to accommodate
primarily external radial loads
and partially axial loads
in both directions

High load carrying capacity
due to large number of spherical
rollers with the largest
possible diameter

Rolling mill drive shaft balancing device
