BEARING INDUSTRIES

The Alternative Power

RKB: the Swiss Premium-Class Bearing Manufacturer

The **RKB** Bearing Industries Group is the Swiss manufacturing organization operating in the bearing industry for over 70 years, with a monthly production capacity exceeding 350 tons of machined steel. The experience gained over the years provides **RKB** with the know-how and expertise necessary for the development and manufacture of technological industrial bearings up to 1925 mm outer diameter. **RKB** offers reliable cost-effective solutions, with extreme operational flexibility, leading-edge service, huge stock availability, short delivery time and the quality typical of a consistent premium-class bearing source. With a worldwide distribution network and exports to more than 50 countries, **RKB** is globally recognized as *"The Alternative Power"* in the bearing industry.

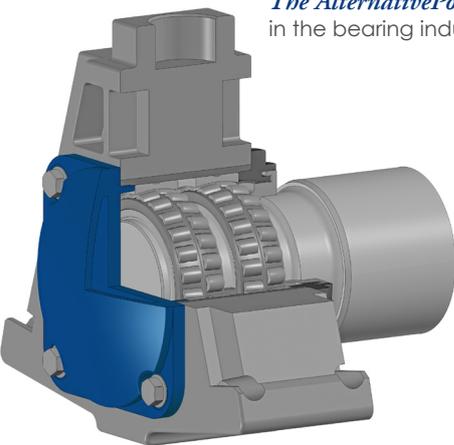

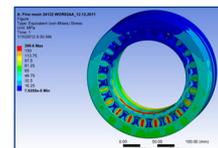

RKB Bearings for the Railway Industry

The rolling bearings expressly designed and manufactured by RKB for the railway industry will help you ensure **smooth transportation operations** all over the world. The engineering know-how and manufacturing skills gained over time as well as the **international approval** from many key customers of the sector have made of RKB a well-known **reliable source** of top quality products and services for the specific needs of the railway players.

Engineering and Manufacturing Solutions at Your Service!

- Technical consultancy
- Application analysis and feasibility study
- Engineering and design
- Advanced calculations
- FEM and semi-analytical simulations
- Project co-engineering
- Product customization and optimization
- Advanced and flexible manufacturing technology
- Qualified on-field assistance

Special Technical Features for RKB Railway Bearings

- **High cleanliness steels** (RKB RAV protocol) for extended service life
- **RKB Phosphate Treatment (PT)** for excellent friction, corrosion and wear resistance
- **RKB Stabilizing Treatment (S)** to avoid bearing dimensional changes due to temperature increase during operation
- **RKB Isothermal Bainite Heat Treatment (HB)** to remarkably reduce the incidence of cracking

Examples of RKB Railway Bearing Arrangements

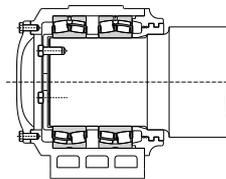

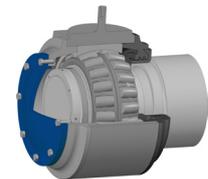

Double row taper roller bearings
in face-to-face arrangement (TDI configuration)

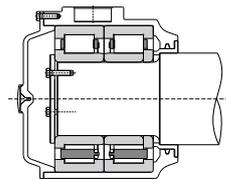

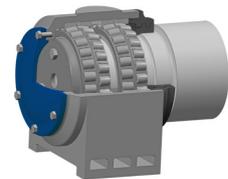

Double row taper roller bearings
in back-to-back arrangement (TDO configuration)

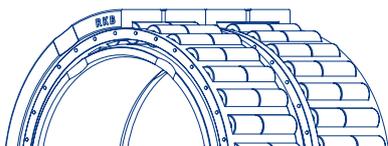

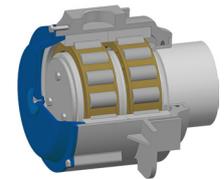

Single spherical roller bearings

Paired spherical roller bearings

Paired cylindrical roller bearings (NJW+NJPW configuration)
