

New RKB Branches in Panama and North Macedonia

Following the rapid growth of recent years, RKB continues to expand, with two new branches ready to enhance the quality of their supply chain further.

RKB Sudamericana

Located in Panama, RKB Sudamericana features a large, modern bearing storage facility designed to serve all American countries swiftly.

Situated in the Albrook Free Zone (Zona Franca de Albrook), it enjoys a strategic

location with fast access to both the Atlantic and Pacific Oceans and excellent connections, including a transport terminal, subway, train, airport, and hotels for customers.

In addition to the warehouse, the facility will house offices, a showroom, and

a training room to facilitate technical guidance for their partners and end users. Albrook's extended customs work schedule will enable RKB to provide rapid service to their customers, significantly reducing transit times.

"We are working against the clock to ensure that RKB Sudamericana is fully operational by the beginning of September. In the coming weeks, the racks will be installed, and we will begin stocking our first container."

Javier Yrazusta Ayuso, Area Manager

RKB Balkans

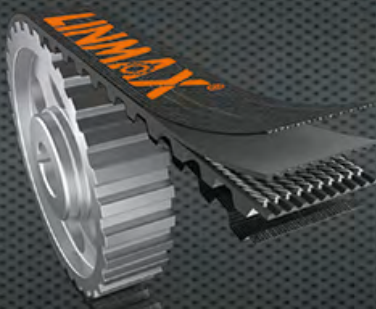

In Europe, specifically in North Macedonia, RKB Balkans has been established to serve a wider market and foster closer relationships with clients.

This branch will focus on sales and back-office operations, staffed by professionals with extensive experience and expertise.

Their addition strengthens RKB's overall capabilities, allowing the Swiss manufacturer to offer a more

LINMAX[®]

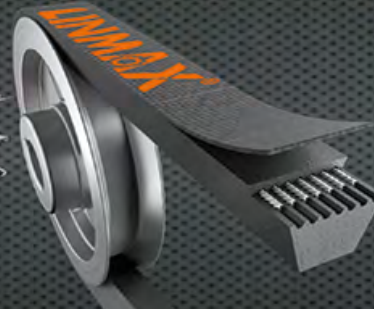

- Top quality industrial and automotive belts and accessories
- 40 years of experience in the manufacture of belts
- 8 factories, 500 workers, 70000 m² production area
